

Digital Signage CDMS — Manual Operator: Standard Programs (V5.0)

Manual ini mencakup semua yang perlu diketahui operator untuk bekerja dengan **standard programs** — playlist dan scroll text. Manual ini juga memuat **bab bersama** (login, media library, player monitoring, log, statistik) yang dipakai operator dari semua jenis program lainnya.

Untuk **touch programs** interaktif, lihat [Operator Manual — Touch Programs](#).

Untuk **stitched video walls** (satu program melintasi beberapa display), lihat [Operator Manual — Stitching Programs](#).

Tugas administrasi sistem (organization, user, role, system file, system config, backup, billing strategy, player registration, dll.) berada di luar lingkup manual ini.

Daftar Isi

1. [Memulai](#)
 2. [Rapid Publishing](#)
 3. [Pengelolaan Media Library](#)
 4. [Produksi Program](#)
 5. [Publishing](#)
 6. [Player Monitoring](#)
 7. [Log](#)
 8. [Statistik Playback Log](#)
-

1. Memulai

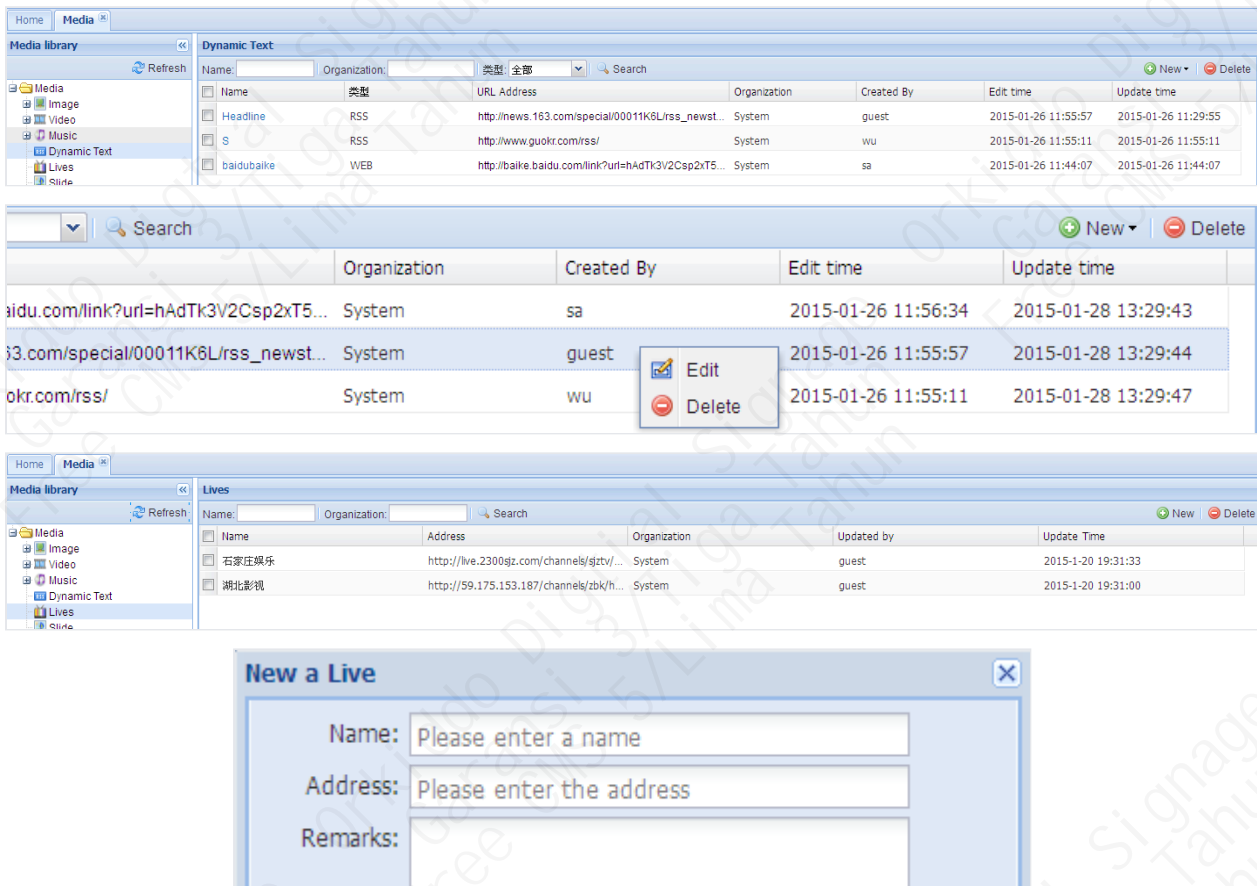

Bab ini menjelaskan cara mengakses console CDMS dan mengenal halaman home sebelum memulai tugas operator. **Operator standard dan operator touch memulai dari sini.**

1.1 Login

CDMS berjalan di web browser standar; tidak perlu install client. Anda dapat login dari PC mana saja yang terhubung jaringan.

1. Di address bar browser, ketik URL server, misalnya `http://192.168.0.x:8088/cdms/`, lalu tekan **Enter**.
2. Pilih bahasa operasi: **English** atau **Simplified Chinese**.
3. Masukkan **user name**, **password**, dan **security code**.
4. Klik **Login** untuk masuk ke CDMS. Klik **Reset** untuk membersihkan form dan input ulang.
5. Setelah selesai, klik **Logout** untuk keluar dari sistem.

Screenshots:

1.2 Tinjauan Halaman Home

Setelah login, halaman home ditampilkan. Terdapat lima area utama:

- **Menu Bar** — akses ke setiap fitur CDMS. Menu Help menyediakan quick-start guide dan FAQ.
- **System Info** — menampilkan akun user saat ini dan instant message; memungkinkan user settings atau logout.
- **Feature Blocks** — akses cepat ke fitur yang sering dipakai.
- **System Overview** — menampilkan status player saat ini dan informasi exception.
- **System Information** — menampilkan batas jumlah player dan tanggal expiration dari sistem manajemen.

2. Rapid Publishing

Menu **Rapid** menuntun Anda membuat dan mempublikasikan standard program dalam tiga langkah terbimbing. Pakai workflow ini ketika Anda perlu menayangkan konten dengan cepat.

Rapid Publishing selalu menghasilkan standard program (non-interaktif). Untuk konten interaktif, pakai workflow Touch.

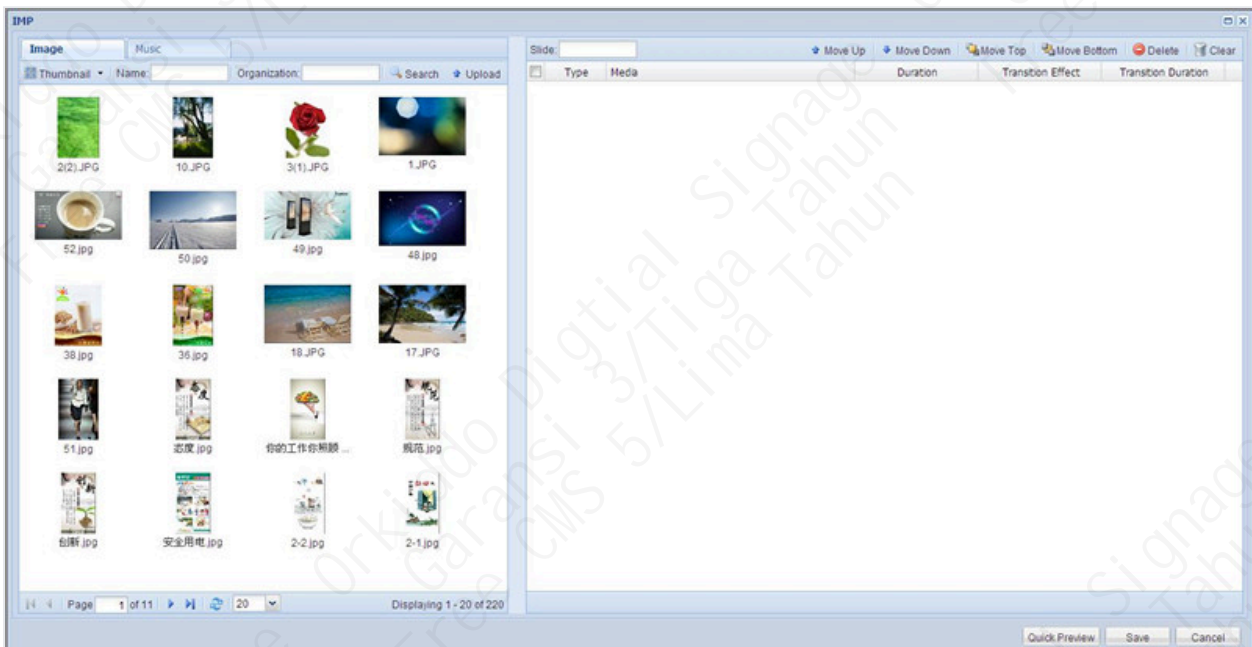

2.1 Langkah 1: Pilih Template

Template mendefinisikan layout di layar dengan membagi screen menjadi zone konten (image zone, video zone, dll.).

1. Dari menu bar klik **Rapid** untuk memulai wizard.
2. Pilih template yang ada dari list, atau klik **New** untuk membuat baru. Saat membuat, pilih jenis template di pane kiri, klik **New**, lalu pilih sistem operasi player.
3. Isi informasi template yang diperlukan lalu klik **OK** untuk membuka template editor.
4. Edit layout, lalu klik **Save** untuk menyimpan. Klik **Next** untuk lanjut ke Langkah 2.

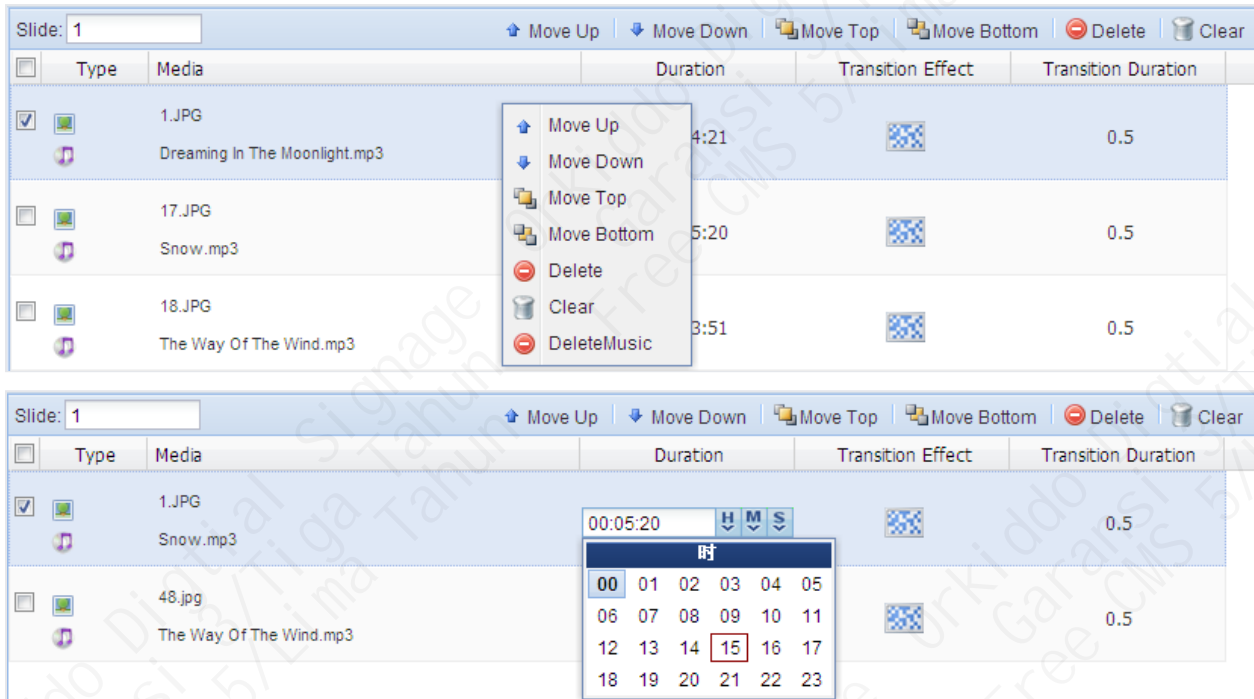

Untuk detail lengkap editing template, lihat section [4.1 Templates](#).

Screenshots:

Type	Media	Duration	Transition Effect	Transition Duration
1.JPG		00:00:10		0.5
17.JPG		00:00:10		0.5

Type	Media	Duration	Transition Effect	Transition Duration
1.JPG	Dreaming In The Moonlight.mp3	00:04:21		0.5
17.JPG	Snow.mp3	00:05:20		0.5

2.2 Langkah 2: Bangun Playlist

Playlist dihasilkan dengan menambahkan file media ke template.

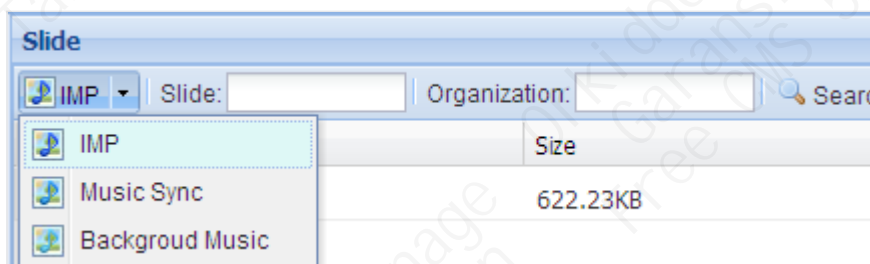

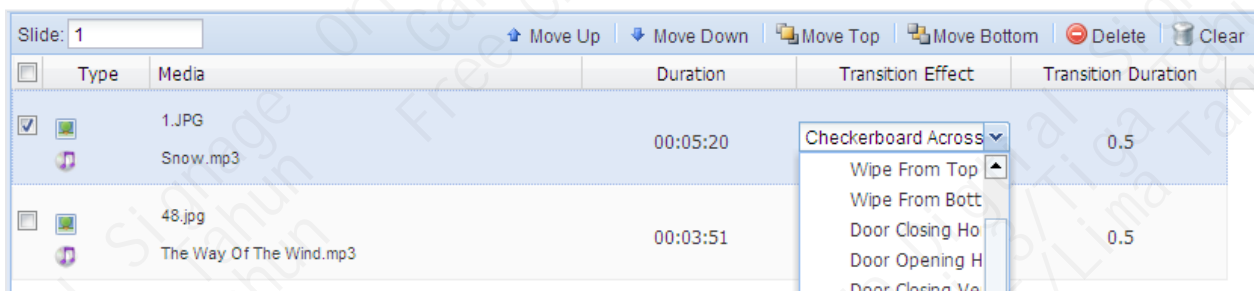

1. Drag file media dari media library di kiri ke zone yang sesuai di template kanan.
2. Pindah zone dengan klik zone di template atau tab di section bawah, lalu edit konten dan properties tiap zone.
3. Klik **Quick Preview** atau **Actual Preview** untuk verifikasi playlist.
4. Klik **Save** untuk menyimpan playlist, lalu klik **Next** untuk lanjut ke Langkah 3. **Back** kembali ke halaman sebelumnya tanpa save.

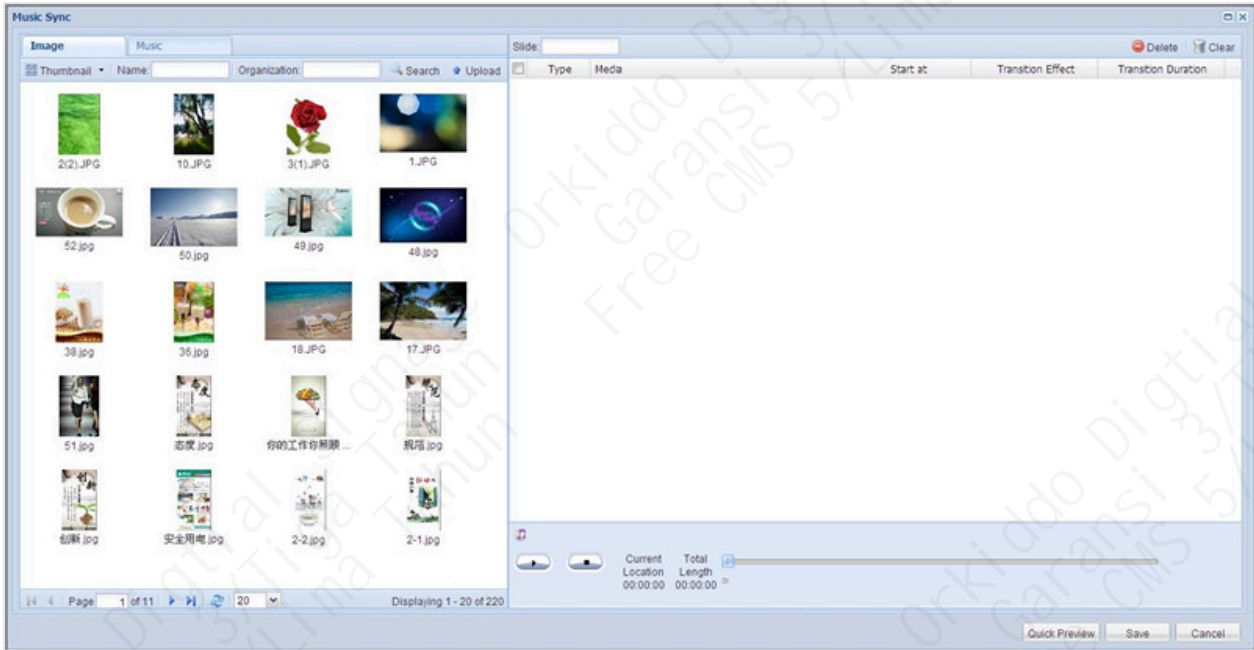

Konten yang didukung per zone:

Zone	Konten yang diterima
Bg	Image, Color
Video	Image, Video, Music, Slide, Live
Image	Image
Text	Dynamic text atau scroll text yang diketik langsung
Logo	Image
Date / Time / Timer / Floor	Tidak perlu konten tambahan
Static text	Teks tetap yang Anda ketik
Web	Halaman web
Mask	Image mask yang sudah disiapkan
Dynamic Table	Dynamic table yang dibuat di Media
Button	Aksi jump
Touch	Touch application (single launch point dalam standard program)
Stream	Video, sumber live

CATATAN: Harus ada konten di main play area, kalau tidak playlist tidak bisa disimpan.

<input type="checkbox"/>	17.JPG	00:00:10	Wipe From Bottom	0.5

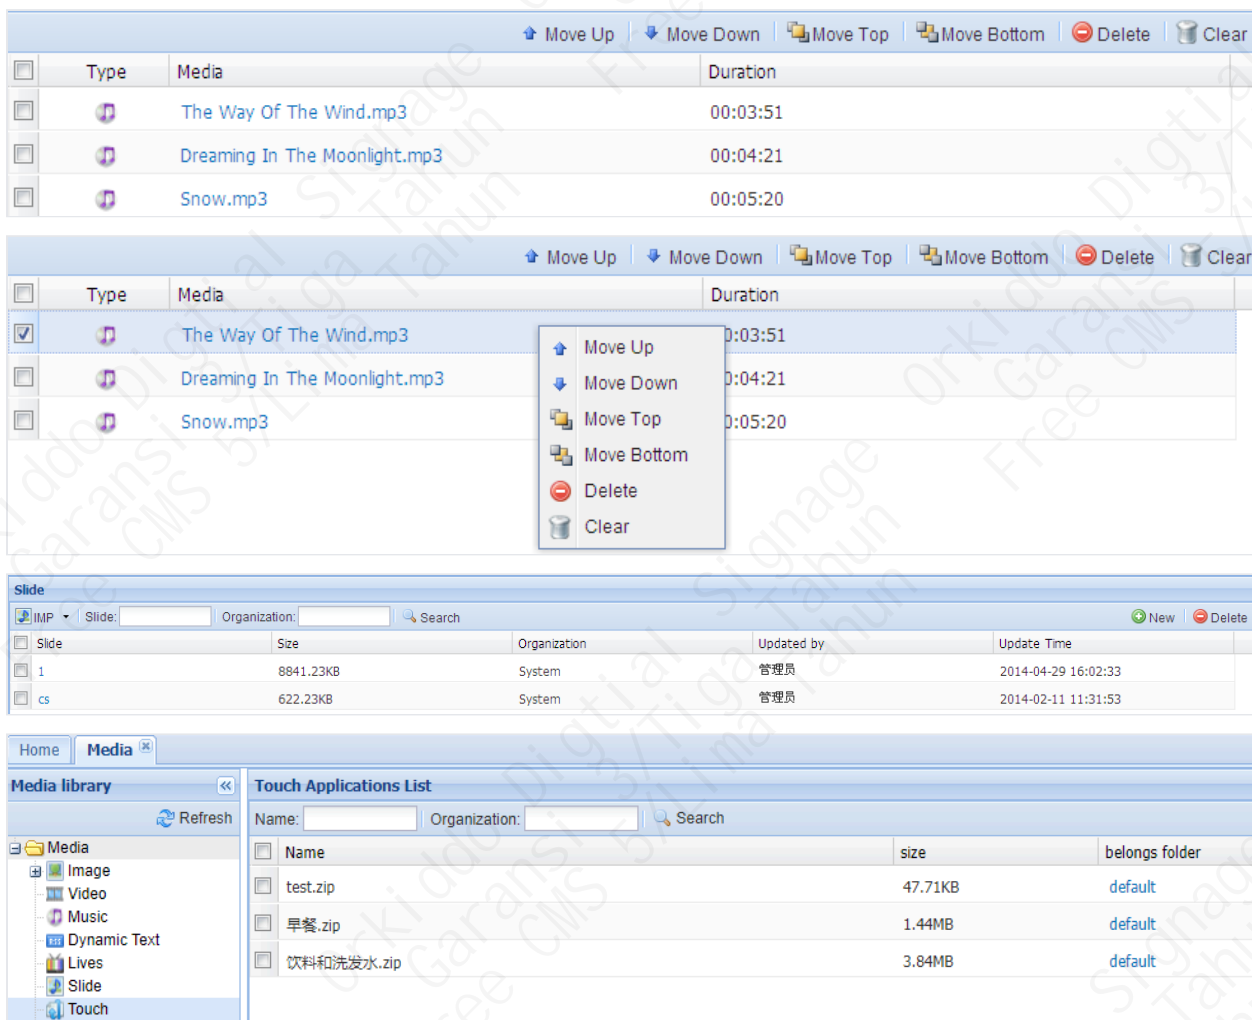

2.3 Langkah 3: Publish

Publishing mendistribusikan playlist ke satu atau lebih player.

1. Di kolom **Playlist**, tentukan jenis program (Playlist atau Scroll Text) lalu klik **Add** untuk melampirkan konten. Klik kanan untuk preview, hapus, atau urutkan ulang.
2. Di kolom **Publish Attribute**, atur opsi publish (lihat section 5.1 untuk deskripsi lengkap tiap opsi).
3. Di panel kiri, pilih target organization, group, atau player individu. Item terpilih muncul di kolom kanan *Targeted Player / Organization / Group*.

4. Klik **OK** untuk submit. Program didistribusikan segera jika tidak ada approval strategy yang aktif.

Screenshots:

3. Pengelolaan Media Library

Menu **Media** mengelola setiap aset multimedia yang nantinya bisa ditempatkan di playlist. **Bab ini dibagi dengan manual Touch Programs** — operator touch memakai library yang sama untuk gambar, video, musik, dokumen, dan touch applications.

3.1 Upload Image / Video / Music

Image, video, dan music di-upload dengan cara yang sama. Contoh di bawah memakai Image.

- **Format image yang didukung:** jpg, jpeg, bmp, png, gif.
- **Format video yang didukung:** avi, mpeg, wmv, mpg, ra, rm, ram, rmvb, dat, mov, asf, mtv, mkv, 3gp, mp4, amv, dmv, swf, divx, ts, flv.
- **Format music yang didukung:** mp3, wma, ogg, aac, wav.

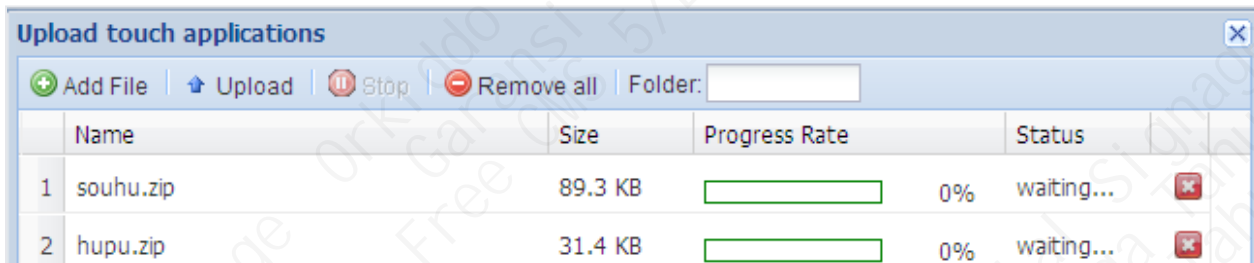

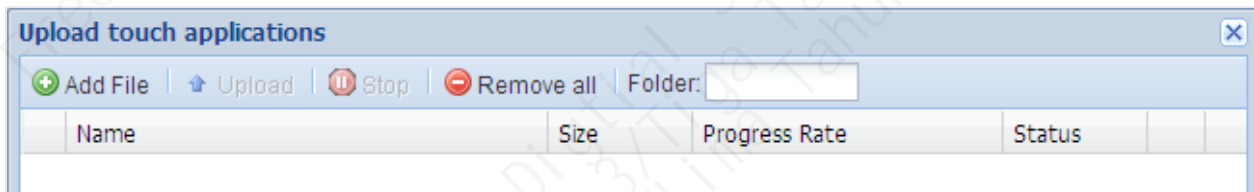

Upload File Lokal

1. Klik **Media > Image** (atau Video, atau Music).
2. Klik **Upload** untuk membuka jendela upload.
3. Klik **Add File** untuk memilih file dari PC. File terpilih muncul di pending list. Pakai **Remove all** untuk membersihkan list. Pakai **Folder** untuk memilih tempat penyimpanan, dan **Advertiser** untuk menetapkan kepemilikan.
4. Klik **Upload** untuk mulai, atau **Stop** untuk membatalkan.
5. Saat upload selesai, file menghilang dari pending list dan muncul di library.

Upload File Remote

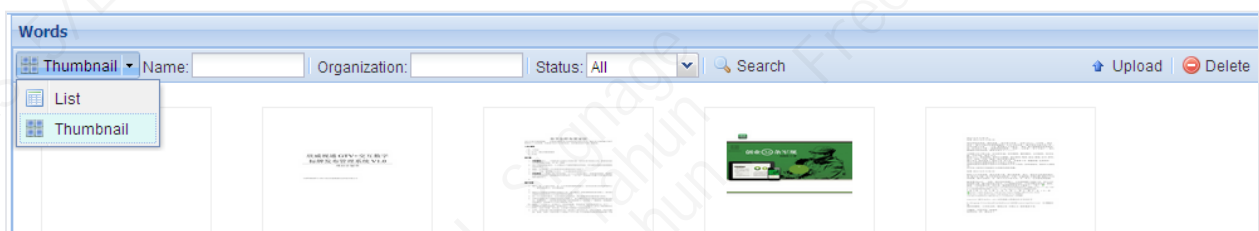

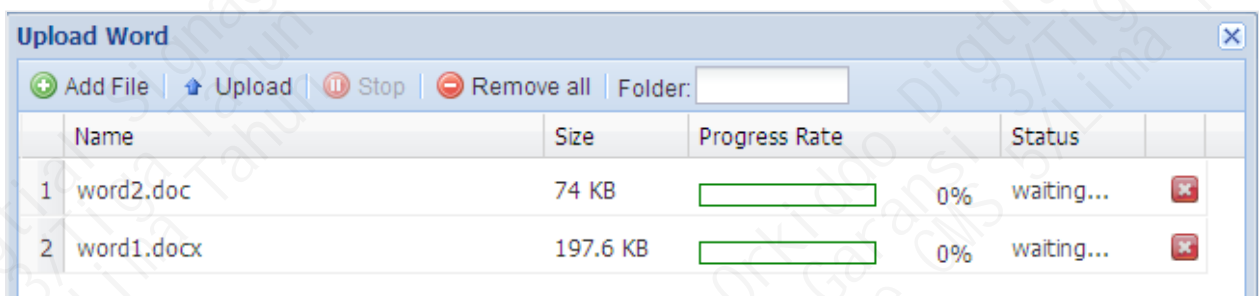

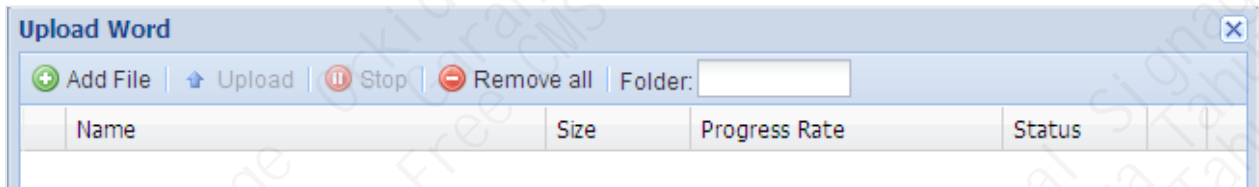

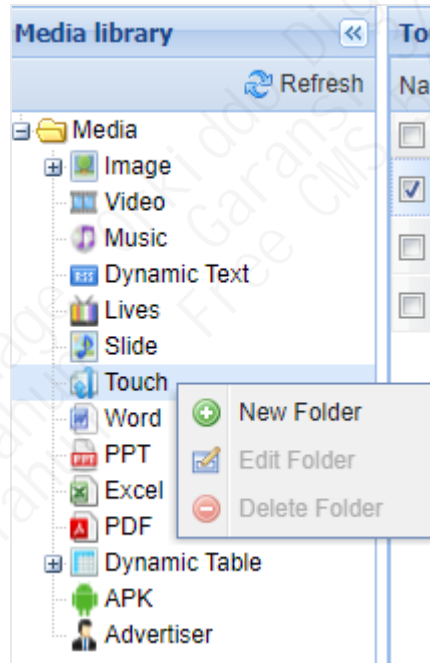

1. Klik **Media > Image** (atau Video, atau Music).
2. Klik **Upload Remote Files**.
3. Pilih **FTP** atau **HTTP** dan masukkan detail koneksi yang diperlukan.
4. Klik **Add File**. Pilih Folder dan Advertiser sesuai kebutuhan.
5. Klik **Upload** untuk mulai, atau **Stop** untuk membatalkan.

3.2 Mengelola Image / Video / Music Library

- **Search** — persempit list dengan satu atau lebih kriteria filter. Klik **Original** dari menu klik kanan untuk melihat gambar asli.
- **Download** — klik kanan item dan pilih **Download**.
- **Delete** — pilih **Delete** dari menu klik kanan atau dari pojok kanan atas di atas list.
- **Copy Picture To Sub Organization** — klik kanan item dan pilih opsi ini, atau pakai tombol di atas list.
- **Details** — saat item di-highlight, kolom kanan menampilkan properties-nya. Field *Folder*, *Advertiser*, dan *Remarks* dapat diedit.
- **Folders** — klik kanan pada node media di panel kiri untuk membuat, edit, atau hapus folder. Public folder terlihat oleh semua user; private folder hanya untuk pembuatnya. Folder default dibuat sistem dan tidak bisa dihapus.

3.3 Dynamic Text

Dynamic text berisi RSS feed atau konten WEB. Siapkan terlebih dulu agar dapat ditambahkan ke playlist nanti.

Membuat RSS Item

1. Klik **Media > Dynamic Text**.
2. Klik **New > RSS**.
3. Masukkan informasi yang diperlukan; kolom kanan menampilkan preview konten.
4. Klik **OK**.

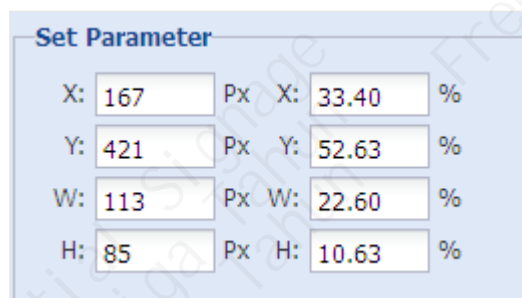

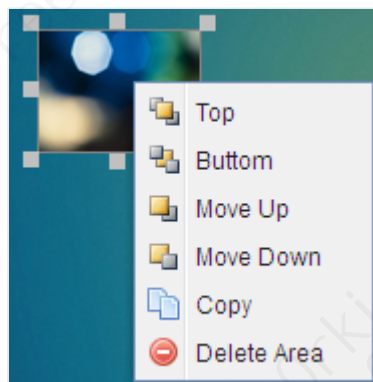

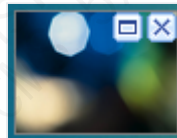

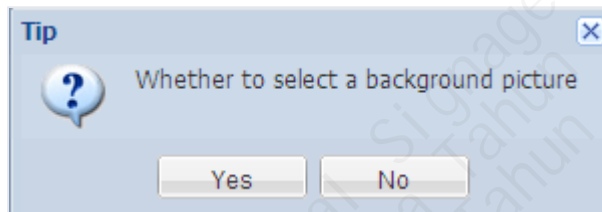

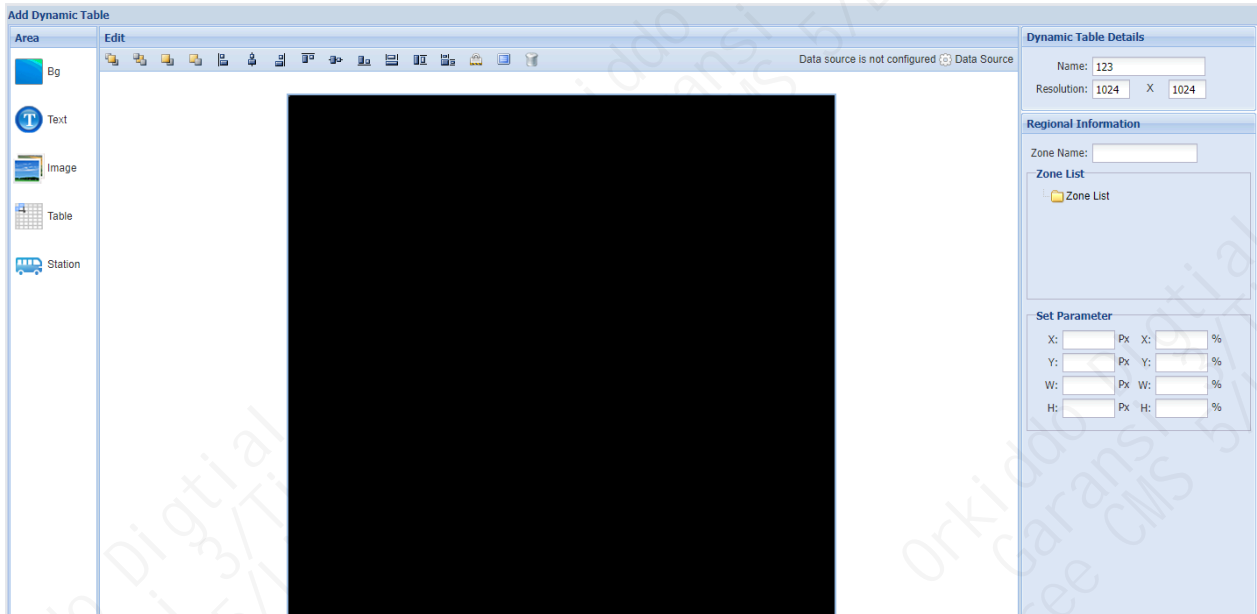

Membuat WEB Item

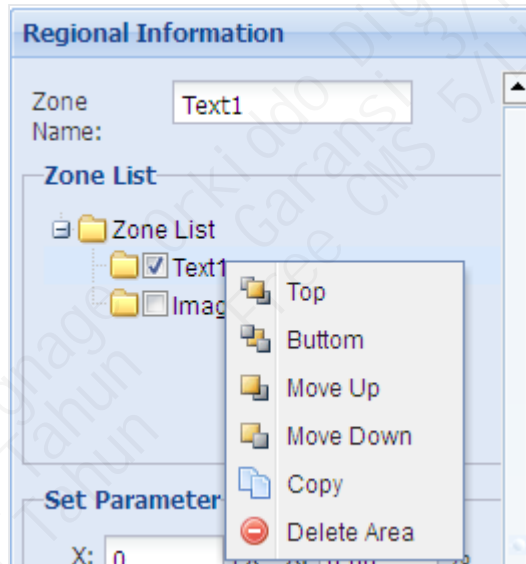

1. Klik **Media > Dynamic Text**.
2. Klik **New > WEB**.
3. Masukkan name dan informasi web; preview di kanan.
4. Klik **OK**.

Mengelola Dynamic Text Library

Klik kanan entry mana saja untuk edit atau hapus. Pakai kriteria filter untuk mencari item tertentu.

3.4 Lives

Live webcast (RTSP, RTMP) dapat diputar di video zone.

1. Klik node **Lives** di panel kiri.
2. Klik **New**.
3. Masukkan name dan alamat web.
4. Klik **OK**. Sumber live baru muncul di Lives Library.

Klik kanan entry live untuk preview, edit, atau hapus.

3.5 Slides

Tiga jenis slide didukung. Siapkan slide terlebih dulu agar bisa ditambahkan ke playlist nanti.

- **IMP** (digital poster) — gambar dan music yang cocok diputar bersamaan; setiap group beralih saat keduanya selesai. Group loop terus menerus.
- **Music Sync** — beberapa gambar diputar berurutan saat satu file music diputar. Playback berhenti saat keduanya selesai.
- **Background Music** — beberapa gambar diputar dengan beberapa file music sebagai background; keduanya loop terus menerus.

Membuat IMP Slide

1. Klik **Media > Slide** dan pilih **IMP**.
2. Klik **New** untuk membuka IMP editor.
3. Beri name untuk slide.
4. Tambah gambar: drag dari media library kiri ke work space. Tahan **Ctrl** untuk multi-select.
5. Tambah music: drag setiap file music ke gambarnya untuk membentuk group.
6. Atur urutan playback dengan tombol di atas list, atau dengan menu klik kanan (Move Up/Down, Move Top/Bottom, Delete, Delete Music, Clear).
7. Klik sel duration group untuk mengubah periode playback (panjang music sebagai default).
8. Klik sel transition untuk memilih transisi ke gambar berikutnya.
9. Klik **Quick Preview** untuk verifikasi.
10. Klik **Save**.

Membuat Music Sync Slide

1. Klik **Media > Slide** dan pilih **Music Sync**.
2. Klik **New** untuk membuka editor.
3. Beri name untuk slide.
4. Drag gambar ke work space (Ctrl untuk multi-select).
5. Atur duration dan transition setiap gambar.
6. Drag satu file music ke music section.
7. Klik **Quick Preview**, lalu **Save**.

Membuat Background Music Slide

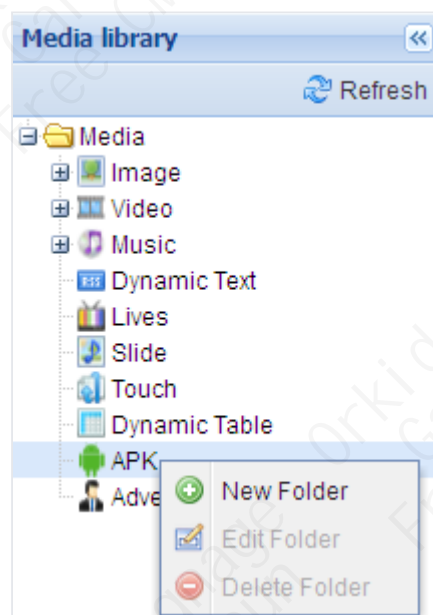

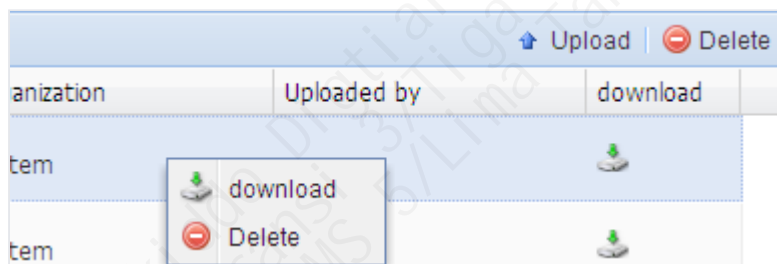

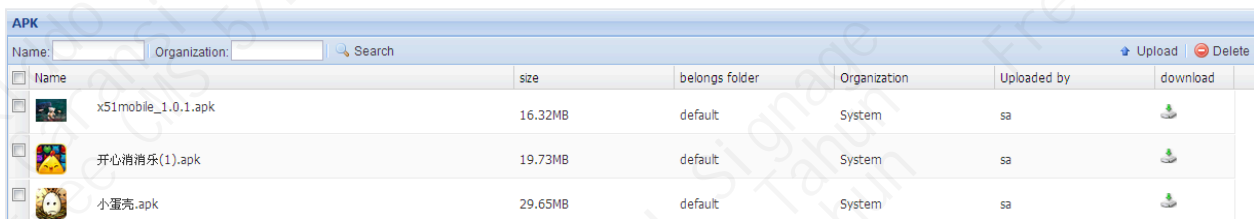

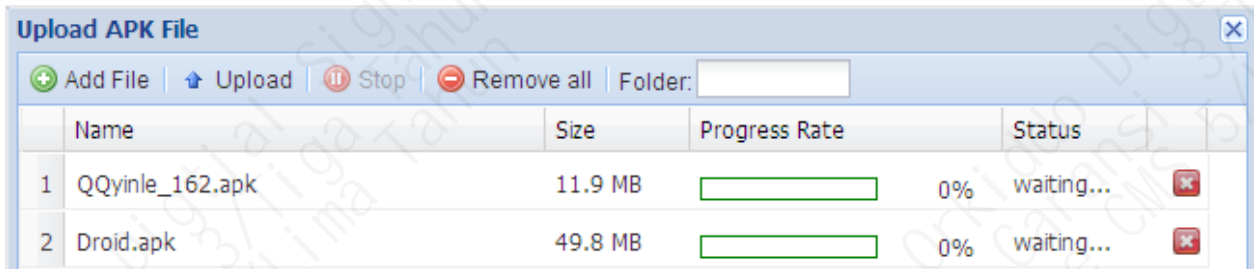

1. Klik **Media > Slide** dan pilih **Background Music**.
2. Klik **New** untuk membuka editor.
3. Beri name untuk slide.
4. Drag gambar ke image section; atur duration dan transition setiap gambar.
5. Drag file music ke music section.
6. Urutkan ulang gambar dan music dengan tombol di atas tiap list, atau lewat menu klik kanan.

7. Klik **Quick Preview**, lalu **Save**.

Mengelola Slide Library

- **Search** — filter dengan satu atau lebih kriteria.
- **Edit** — klik nama slide untuk membuka editor; **Save** untuk menerapkan perubahan.
- **Delete** — pilih slide dan klik **Delete**.

3.6 Touch Applications

Touch applications adalah komponen interaktif reusable. Standard program dapat meluncurkannya dari zone **Touch**; touch program dapat meluncurkannya dari button atau Web zone. Harus di-zip (.zip) sebelum upload.

1. Klik **Media > Touch**.
2. Klik **Upload**.
3. Klik **Add File** untuk memilih file zip dari PC. Pakai **Folder** untuk memilih tujuan.
4. Klik **Upload** untuk mulai, atau **Stop** untuk membatalkan.

Mengelola touch applications yang sudah di-upload:

- **Search** — filter dengan kriteria.
- **Download** — klik icon download, atau pakai opsi **Download** dari menu klik kanan.
- **Delete** — pilih aplikasi dan klik **Delete** di atas list.
- **Folders** — klik kanan **Touch** di panel kiri untuk membuat, edit, atau hapus folder.

3.8 Dynamic Table

Dynamic table memungkinkan Anda update konten di layar secara real time tanpa perlu re-publish program.

Membuat Dynamic Table

1. Pada halaman **Dynamic Table**, klik **New**.
2. Beri name, definisikan resolusi, lalu klik **OK**.
3. **Tambah background (opsional)**. Klik **Bg** di kolom Area kiri; klik **OK** untuk menambah background image. Hanya satu background image diizinkan. Jika menolak, background hitam; warnanya bisa diubah di section Style.
4. **Tambah zone** dari kolom Area kiri: Text (satu), Image (sampai empat), Table, Station. Hover atau klik kanan zone untuk menghapus.
5. **Atur size dan posisi** dengan drag, atau dengan memasukkan nilai koordinat di pane kanan. Pakai toolbar untuk align (left, center, right, top, middle, bottom), match width/height, lock/unlock, fill screen, atau clear semua zone.

6. **Atur layer zone** lewat menu klik kanan atau layer toolbar (Move up, Move down, Top layer, Bottom layer).

7. Klik **Save**.

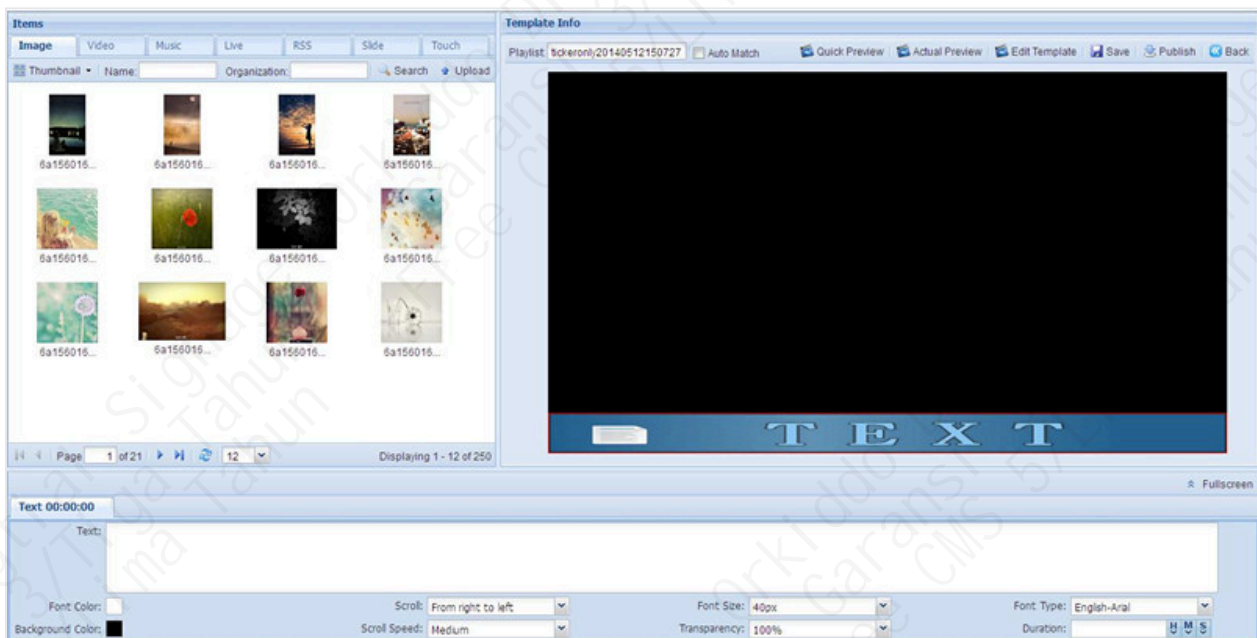

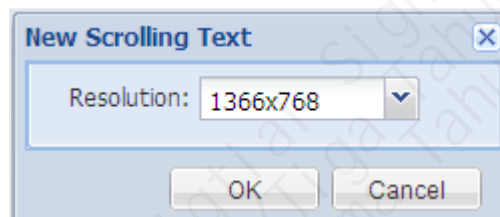

Mengelola Dynamic Table Library

- **Search** — filter dengan kriteria; klik nama untuk preview.
- **Delete** — **Delete** dari menu klik kanan atau pojok kanan atas.
- **Edit** — klik nama di list atau pilih **Edit** dari menu klik kanan. Perubahan yang disimpan otomatis terefleksi di terminal display, tanpa re-publish.

Next Pack Program

4. Produksi Program

Menu **Program** memungkinkan Anda membangun artefak yang akan dipublikasikan ke player: template, playlist, dan scroll text. Ketiganya khusus untuk standard program.

4.1 Templates

Tersedia dua library:

- **System Template** — terbuka untuk semua user.
- **User Template** — hanya terlihat oleh pembuat dan atasannya.

Membuat Template

1. Klik **Program > Template**.
2. Pilih jenis template di pane kiri (System atau User).
3. Klik **New**, lalu masukkan informasi yang diperlukan. *Resolution* mengacu pada resolusi display screen; *Type* adalah jenis template dari langkah 2.
4. Klik **OK** untuk membuka template editor.
5. **Tambah background (opsional)**. Klik **Bg** di kolom Area kiri; klik **OK** untuk menambah image. Hanya satu background image diizinkan. Jika menolak, background hitam; warnanya bisa diubah di section Style.
6. **Tambah zone** dari kolom Area kiri. Zone yang tersedia: Bg, Video, Image, Text, Logo, Date, Time, Touch, Stream, Web, Mask, Button, Dynamic Table, Floor, PM2.5, Static Text. Beberapa zone memiliki batas instance atau tidak dapat overlap.
7. **Atur posisi dan size** zone dengan drag, atau pakai alignment toolbar (Align Left/Center/Right/Top/Middle/Bottom, Match width/height, Lock, Unlock, Fill screen, Clear).
8. **Atur layer zone** dengan layer toolbar (Move Up, Move Down, Top, Bottom). Klik kanan zone untuk opsi yang sama.

9. **Atur main play area** (hanya Android). Durasi playback keseluruhan tergantung pada main play area. Zone Background, Image, Video, Touch, dan Web dapat ditetapkan sebagai main play area. Untuk template Signway OS dan Windows, main play area adalah video zone sebagai default.
10. Klik **Save**. Pakai **Save and Use** untuk save dan lanjut ke playlist editing; pakai **Back** untuk kembali tanpa save.

CATATAN: Video zone diperlukan untuk template Signway OS dan Windows, tapi tidak diperlukan untuk template Android.

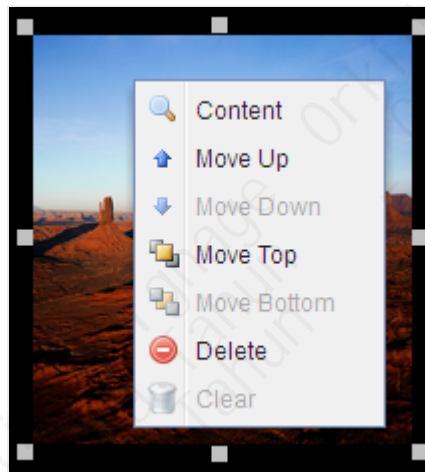

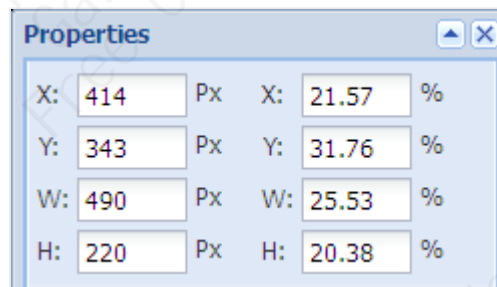

Import Template

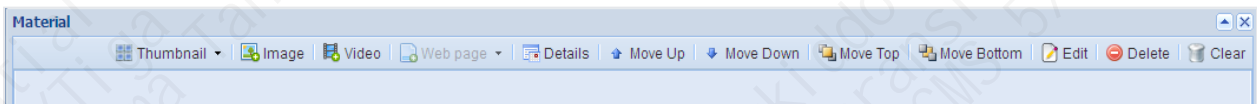

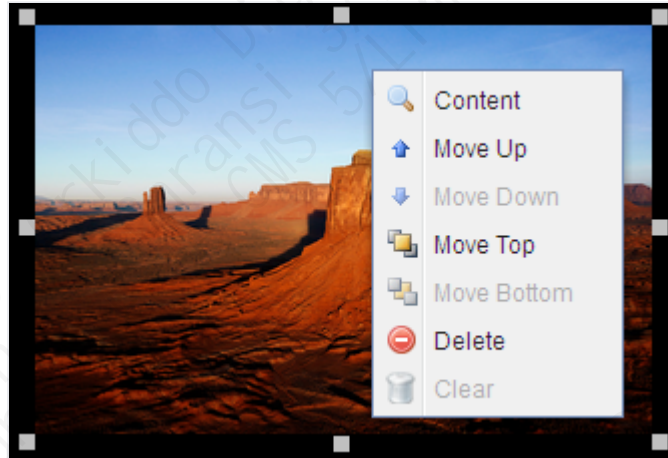

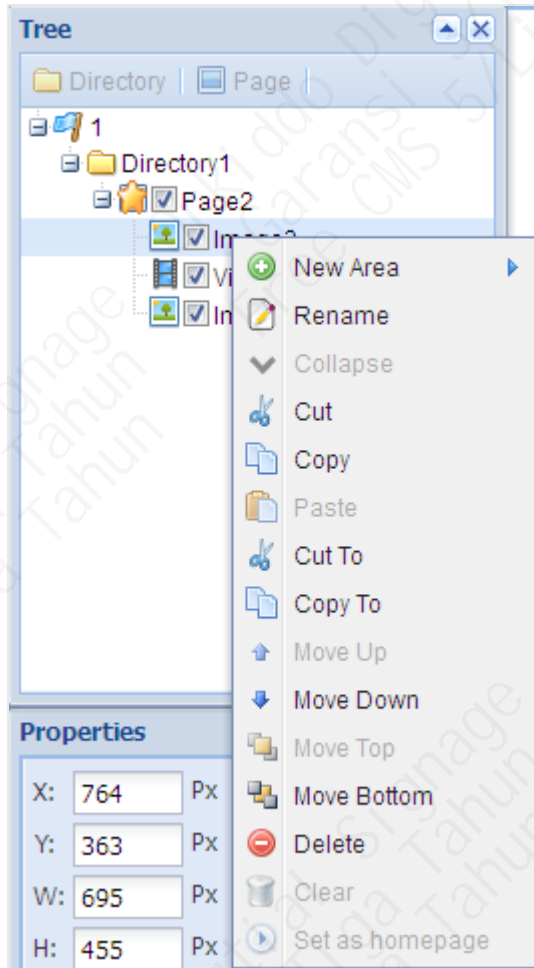

1. Klik **Program > Template**.
2. Klik **Import**.
3. Klik **Add File** dan pilih file template dari PC.
4. Klik **Upload** untuk mulai, atau **Stop** untuk membatalkan.

Mengelola Template Library

- **Search** — filter dengan kriteria.
- **Edit** — klik nama template atau double-click thumbnail-nya; **Save** untuk menerapkan perubahan.
- **Export** — klik **Export**.
- **Delete** — klik **Delete**.

Player

Status

4.2 Playlists

Playlist adalah urutan konten yang ditampilkan di player. Hasilkan dengan menambahkan file media ke template.

Membuat Playlist

1. Klik **Program > Playlist**.
2. Klik **New**.
3. **Pilih template**: pilih jenis di pane kiri, lalu pilih template di kanan. Cocokkan dengan OS player, jenis konten, dan ukuran/orientasi screen. Jika tidak ada template yang cocok, buat dulu (lihat 4.1).
4. Klik **OK** untuk membuka playlist editor.
5. **Tambah konten** ke setiap zone dengan drag file media dari library kiri ke zone di template, atau ke section konten di bagian bawah zone.
6. **Pindah zone** dengan klik zone di template atau tab di section bawah.
7. Klik **Quick Preview** atau **Actual Preview** untuk verifikasi. Quick Preview hemat bandwidth; Scale Preview ukuran layar asli.
8. Klik **Save**. Pakai **Back** untuk membatalkan. Setelah save, klik **Publish** untuk mendistribusikan.

CATATAN: Harus ada konten di main play area, kalau tidak playlist tidak bisa disimpan.

Edit Setiap Zone

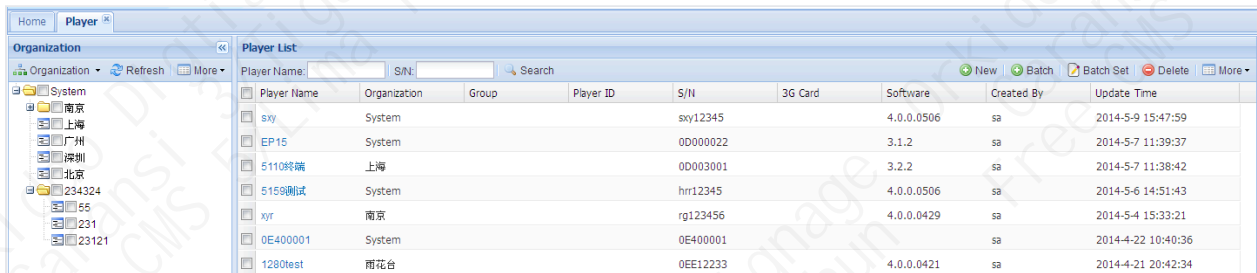

- **Bg** — klik toolbar di atas section untuk view detail, edit static text, atau hapus konten. Klik kanan pada background image untuk opsi yang sama. Untuk mengganti background, hapus image saat ini dulu, lalu tambah yang baru.
- **Static Text** — di bawah tab Bg, klik **Edit** untuk membuka editor static-text.
- **Video / Image** — toolbar memungkinkan Anda Preview, lihat Details, Move Up/Down/Top/Bottom dalam queue, Edit (name, schedule, duration, expiration, transition), Delete satu item, atau Clear semua.
- **Web** — klik **+** untuk menambah entry web; klik icon edit untuk mengubah.
- **Touch** — hanya satu touch application yang bisa mengisi zone ini. Hapus yang ada sebelum menambah yang baru.
- **Button** — atur **Action** (Jump to playlist atau Jump to touch) dan **Target** (playlist atau touch application tertentu).
- **Dynamic Table** — klik kanan untuk preview, edit, atau hapus. Mengedit dynamic table di kemudian hari akan update konten di terminal tanpa re-publish.
- **Mask** — beberapa mask image bisa ditambahkan; klik kanan untuk preview, edit, atau hapus.
- **Logo** — hanya satu logo image diizinkan; hapus yang ada sebelum menambah yang baru.

- **Text** — masukkan teks dan atur font, scroll style, background, duration. Dynamic text juga bisa ditambahkan; konten dynamic text tidak bisa diedit di sini, hanya properties.
- **Date / Time** — tidak dapat diedit.

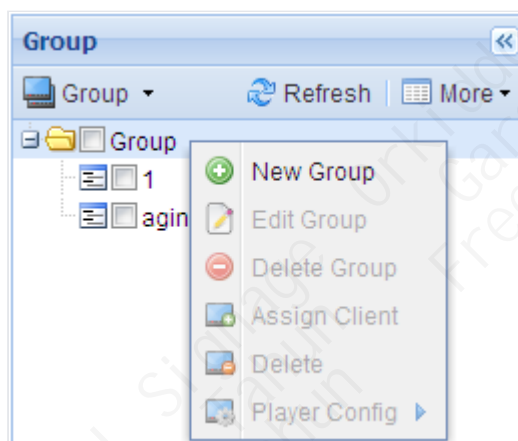

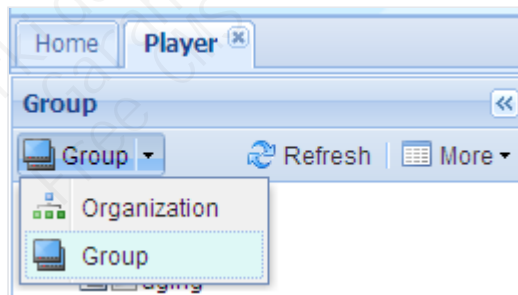

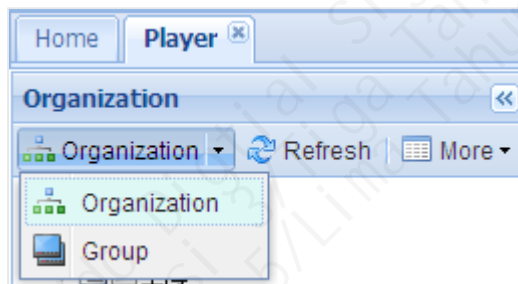

Mengelola Playlist Library

- **Search** — filter dengan kriteria.
- **Delete** — klik **Delete** untuk menghapus satu atau lebih playlist.
- **Edit** — klik nama playlist atau icon Edit di kolom Operate.
- **Publish** — saat status *Normal*, klik **Publish** di kolom Operate untuk mendistribusikan.

4.3 Scroll Text

Scroll text terpisah dari playlist dan tidak terpengaruh saat playlist berganti.

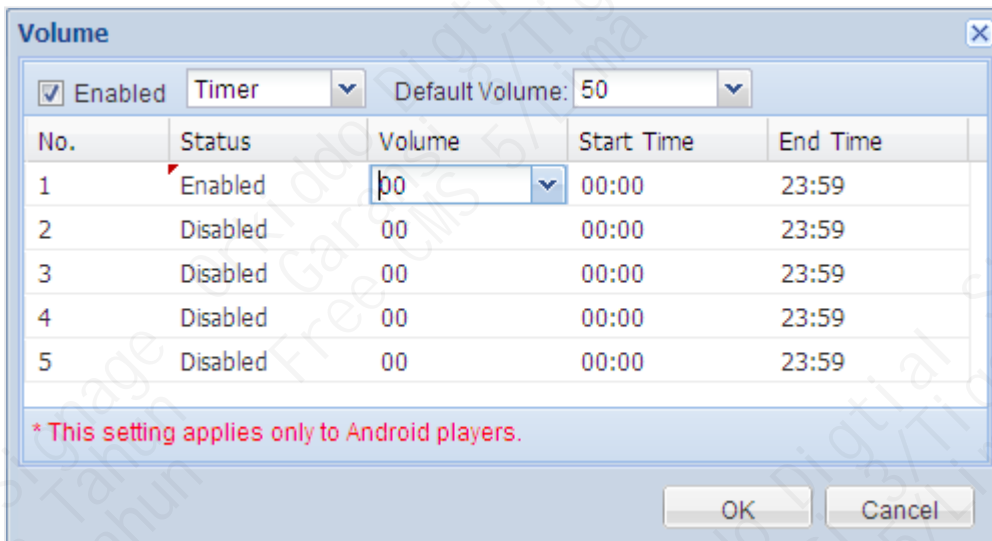

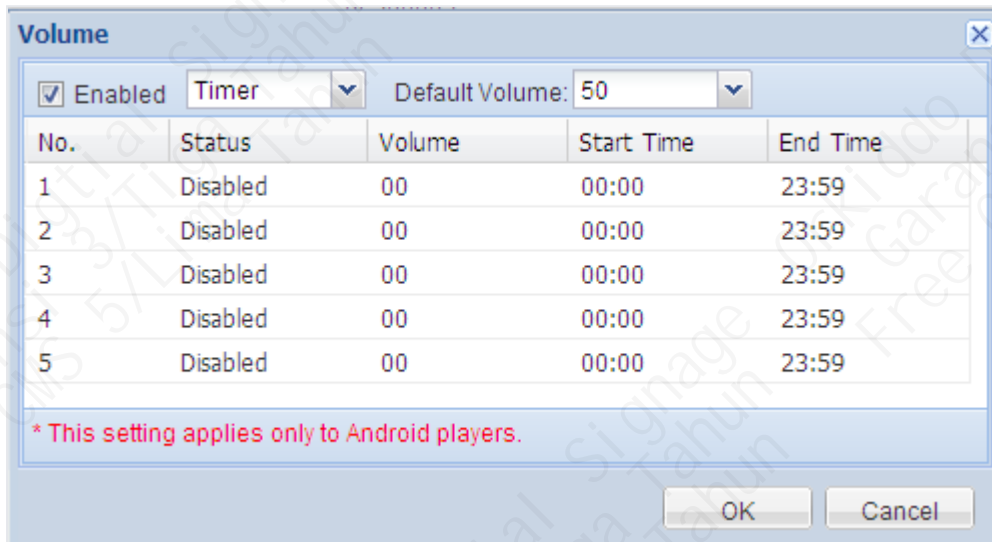

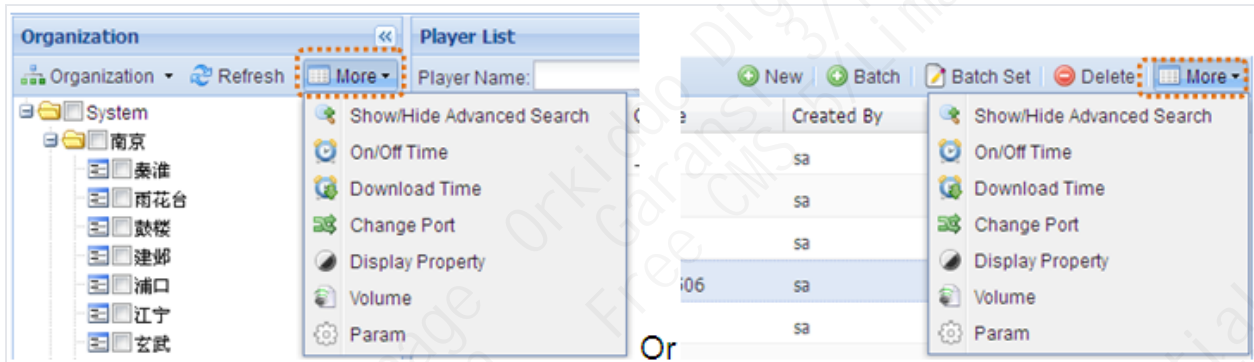

Membuat Scroll Text

1. Klik **Program > Scroll Text**.
2. Klik **New**.
3. Tentukan resolusi screen lalu klik **OK**.
4. Beri name unik untuk scroll text. Centang **Auto Match** jika ingin scroll text tampil di posisi text zone sebelumnya; jika tidak akan tampil sesuai pengaturan.
5. Masukkan teks dan konfigurasi di section editing di bawah.
6. Klik **Quick Preview** atau **Actual Preview** untuk verifikasi.
7. Klik **Save**. Setelah save, klik **Publish** untuk mendistribusikan, atau **Back** untuk membatalkan.

Mengelola Scroll Text Library

- **Search** — filter dengan kriteria.
- **Delete** — klik **Delete** untuk menghapus satu atau lebih entry.
- **Edit** — klik nama entry atau icon Edit untuk membuka editor.
- **Publish** — saat status *Normal*, klik **Publish** di kolom Operate.

Screenshots:

5. Publishing

Pakai fitur **Publish** untuk mendistribusikan playlist dan scroll text ke player melalui network. Klik **Program > Publish** untuk membuka halaman publish management.

Semua program yang dipublikasikan (termasuk yang ditolak dan disetujui) tercantum di sini.

Pakai kriteria filter untuk mencari entry tertentu. Klik publish ID untuk detail (konten, schedule, player, approval).

5.1 New Publish

1. Pada halaman publish management, klik **New**. (Mengklik **Publish** di playlist atau scroll-text editor membuka halaman yang sama.)
2. Tentukan jenis program (Playlist atau Scroll Text), lalu klik **Add** untuk melampirkan konten. Klik kanan entry untuk preview, hapus, atau urutkan ulang.
3. Pakai **Cover** untuk mengganti playlist saat ini dengan yang dipilih. Hanya program dengan play mode yang sama yang bisa diganti (loop mengganti loop, dll.). Pakai **Add** untuk menambahkan ke set saat ini.
4. **Atur publish attributes** (lihat opsi di bawah).
5. Di panel kiri, pilih target organization, group, atau player. Item terpilih muncul di *Targeted Player / Organization / Group*.
6. Klik **OK** untuk submit. Program didistribusikan segera jika tidak ada approval strategy yang aktif.

Opsi publish attribute:

Opsi	Nilai
Play Mode	Looping (loop per minggu), Timed (play pada tanggal/waktu tertentu), Break (selingan di schedule saat ini dengan prioritas tertinggi)
Expiration	Ketika tanggal ini tiba, program otomatis dihapus dari CDMS dan player
Publish Strategy	Additional (tambah ke schedule asli tanpa perubahan); Overwrite (hapus schedule asli dan ganti; hanya program dengan mode yang sama yang bisa di-overwrite); Overwrite & Keep (ganti playlist dengan name yang sama sambil mempertahankan urutan asli)
Publish Time	Immediate (publish saat submit) atau Scheduled (publish pada tanggal/waktu tertentu). Pakai Add untuk menambah entry schedule, Delete untuk menghapus

Aturan resolusi:

- Untuk program non-Android, resolusi program harus cocok dengan resolusi terminal.
- Untuk Android, ini tidak diperlukan — program Android horizontal dapat diputar di player Android horizontal mana pun terlepas dari resolusi (misalnya player Android horizontal dapat menampilkan program 1920×1080 dan 1366×768).

Semua playlist dalam satu publish harus menargetkan **Player Type** yang sama. Untuk player non-Android, **Resolution** screen harus cocok.

5.2 Re-Publish

Anda dapat mem-publish ulang program historis.

1. Buka history list via **Program > Publish** atau **Program > Audit**.
2. Klik publish ID.
3. Centang **Retain all property** untuk memakai semua pengaturan asli (konten, schedule, target player). Hilangkan centang untuk mengirim ke player baru atau dengan schedule baru.
4. Klik **Republish** untuk membuka halaman publish dan submit.

5.3 Membersihkan Program dari Player

Bersihkan dari semua player:

1. Klik **Program > Publish**.
2. Centang program dan klik **Clear** di atas list program.

Bersihkan dari player tertentu saja:

1. Klik icon **Edit** di kolom Operate untuk membuka tampilan player.
2. Di tab *In Use*, pilih player untuk dibersihkan dan klik **Delete**. Player yang dihapus tercantum di *Deleted*.

5.4 Audit (Ketika Approval Diperlukan)

Jika approval strategy dikonfigurasi oleh administrator, program harus disetujui sebelum dikirim ke player. Operator dengan audit permission melakukan review.

1. Klik **Program > Audit** untuk membuka halaman approval management.

2. Cari program dengan kriteria filter, atau buka jendela approval dari notifikasi di pojok kanan atas.
3. Klik icon **Approval** untuk program.
4. Berikan komentar dan pilih lulus atau tolak. *Komentar wajib untuk Reject.*

6. Player Monitoring

Menu **Player** menampilkan player status real-time dan memungkinkan Anda mengontrol player dari jauh. **Operator standard dan touch sama-sama memakai bab ini.** Operator biasanya bekerja di **Player > Status**.

Player diorganisir berdasarkan **Organization** dan **Group**. Centang Organization atau Group di panel kiri untuk filter player di kanan.

6.1 Melihat Player Status

Klik **Player > Status**. Player ditampilkan sebagai list atau thumbnail.

Pakai kriteria filter untuk mencari player tertentu. Klik **More > Show / Hide Advanced Search** untuk menampilkan filter lebih banyak.

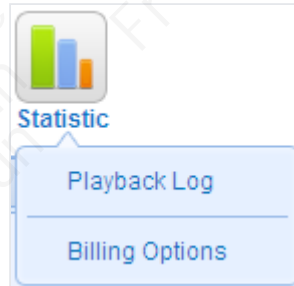

Field status:

- **Progress** — progress download program.
- **Remaining Hard Disk Space** — ruang disk kosong di player.
- **Last Heartbeat** — terakhir kali player berkomunikasi dengan server.

- **Player Status** — Unknown, Connection Lost, Play, Download, Stop, Background Download, Abnormal, Update, Login, Offline, Offline for days, Sleep.

Klik nama player untuk lihat detail. Double-click untuk lihat schedule dan detail publish. Klik **More > Export** untuk export tabel status saat ini.

激活 Windows
转到设置以激活 Windows。

6.2 Player Info

Klik kanan nama player dan pilih **Player Info** (atau double-click nama) untuk membuka halaman informasi player.

6.3 Current Schedule

Klik kanan player dan pilih **Current Schedule** untuk melihat playlist dan program interaktif yang sedang berjalan.

6.4 Program Schedule

Klik kanan player dan pilih **Program Scheduling**. Tiga tampilan tersedia:

Mode	Keterangan
Day	Schedule sehari penuh
Week	Schedule sehari penuh untuk satu minggu
Month	Schedule sehari penuh, ditampilkan sebagai warna background

6.5 Remote Controls

Klik kanan player dan pilih **Player Control** untuk mengontrol playback, stop, reboot, sleep, wake up, volume, dan property lain dari terminal yang terhubung jaringan.

6.6 Screenshot

Klik kanan player dan pilih **Screen Shot** untuk menangkap screenshot dan melihat riwayat screenshot.

6.7 Take Photos

Klik kanan player dan pilih **Take Photos** untuk mengambil foto via kamera player dan melihat riwayat foto.

6.8 Player Logs

Klik kanan player dan pilih **Player Logs** untuk melihat log operasi player. Pilih **Player error log** untuk melihat log error.

6.9 Sync Schedule ke Player Lain

Sync Schedule menyalin schedule yang sudah berjalan dari satu player ke player lain tanpa harus menjalankan workflow publish.

1. Klik **Player > Player** untuk membuka player management.
2. Klik kanan player dan pilih **View Schedule**.
3. Pilih tab **Playlist** atau **Instant Play**.
4. Klik **Sync Schedule**.
5. Pilih target player di kolom kiri dan klik **Assign Client**. Pakai **Delete Player** untuk menghapus player dari list target.
6. Klik **OK**. Schedule saat ini disalin ke target.

CATATAN: Sync Schedule di tab Playlist hanya menyalin schedule playlist (bukan Instant Play), demikian sebaliknya.

6.10 Program Package (Pengiriman USB Offline)

Pack program menjadi file terenkripsi yang dapat dimuat ke player via USB stick.

1. Klik **Player > Player**.
2. Klik kanan player dan pilih **Program Package**.
3. Klik **Pack Program**.
4. Pilih konfigurasi player yang akan disertakan dalam paket.
5. Klik **OK** untuk mulai packing.
6. Setelah packing selesai, download paketnya.

Paket terenkripsi; password decompression default adalah 123456 (berbeda per user). Konten yang sudah di-decompress berisi dua folder, **MEDIA** dan **SYSTEM**. Salin keduanya ke root USB

drive dan tancapkan ke port USB player.

7. Log

Bab ini dibagi dengan manual **Touch Programs**.

7.1 User Operations

Klik **Log > User Operations** untuk melihat operasi yang dilakukan semua user. Filter dengan kriteria; klik **Export** untuk download view saat ini sebagai Excel.

CATATAN: Log user operations disimpan selama 2 bulan.

7.2 Player Monitoring

Klik **Log > Player Monitoring** untuk melihat event player seperti download, login, upgrade, dan exception. Filter dengan kriteria.

CATATAN: Log player monitoring disimpan selama 1 bulan.

7.3 Online Overview

Klik **Log > Online Overview** untuk melihat statistik online per organization. Klik nama organization untuk melihat status online semua player-nya.

7.4 Human Flow

Klik **Log > Human Flow** untuk melihat statistik arus orang per periode, rasio pria dan wanita, serta distribusi umur.

7.5 Adv Rankings

Klik **Log > Adv Rankings** untuk melihat statistik ranking iklan.

8. Statistik Playback Log

Bab ini dibagi dengan manual **Touch Programs** dan **Stitching Programs**.

Klik **Statistic > Playback Log** untuk melihat statistik playback.

- Pakai kriteria filter untuk mencari record tertentu. Klik **Export** untuk download sebagai Excel.

- Set **Type** ke *Media*, *Advertiser*, atau *Player*, lalu klik **Search** untuk melihat statistik per media item, advertiser, atau player.
- Set start date dan end date, lalu klik **Search** untuk melihat statistik periode tertentu.

CATATAN: Log playback disimpan selama 3 bulan.

Akhir manual *Standard Programs*. Untuk *touch program interaktif*, lihat [Operator Manual — Touch Programs](#). Untuk *stitched video walls*, lihat [Operator Manual — Stitching Programs](#).
